

DUST OFF YOUR SIG MODEL AND JOIN IN!

CALLING ALL PILOTS

With Hazel Sig-Hester turning 100 we have involvement with AMA (US) and MAAC (Canada) to get as many SIG models into the air to celebrate this milestone.

**STILL GOT A SIG MODEL IN YOUR WORKSHOP?
GOT AN UNOPENED KIT? GOT A SET OF PLANS?
GOT A BROKEN ONE?**

This might be the best motivation for you to put your SIG model back in the air.

Take some photos, post a story, show people how you have built from scratch or a kit. Put it up on your Facebook pages and let's celebrate your skills.

- Who has the oldest Sig model still flying
- The best refurbishment story
- The best rebuild story
- Create a permanent record of your building adventures of a Sig kit
- Share you build/rebuilding tricks and skills
- Dope and tissue/fabric covering techniques

Use the following Hash tags # for your social media entries

#Hazelturns100
#bestsigmodel
#oldestsigmodel
#100sigmodels

THERE WILL BE A PRIZE
for each state for the best/most interesting SIG model stories.

ON 3RD MARCH 2022,
A FAMOUS TRAIL BLAZING MODELLER
AND INFLUENCER HITS

100

HAPPY BIRTHDAY HAZEL SIG-HESTER!

Thank you for all you have done for Modelling

Join us to showcase the rich history of aeromodelling and the SIG influence. Hazel's ground breaking work with husband Glen, made aeromodelling more accessible to all of us from around the world.

How many SIG aircraft you have flown? Most of us learned to fly on an easy SIG aircraft scratch built or from a kit be it free flight, control line, or radio control. They made them all. Celebrating 100 years of model aviation development that Hazel championed.

To celebrate her 100 years we are trying to get as many SIG aeroplanes at your club, in the air, on the weekend of the

26-27TH FEBRUARY 2022.

Loading as many stories onto MAAA Facebook Meta page to help Hazel see her great work of 100 years.

Dust off, refurbish, rebuild and rekindle your enjoyment of your old SIG models. We want to see what's hiding in your collection!
